

Faculty checklist

Gain easier access to library resources and assistance wherever you are:

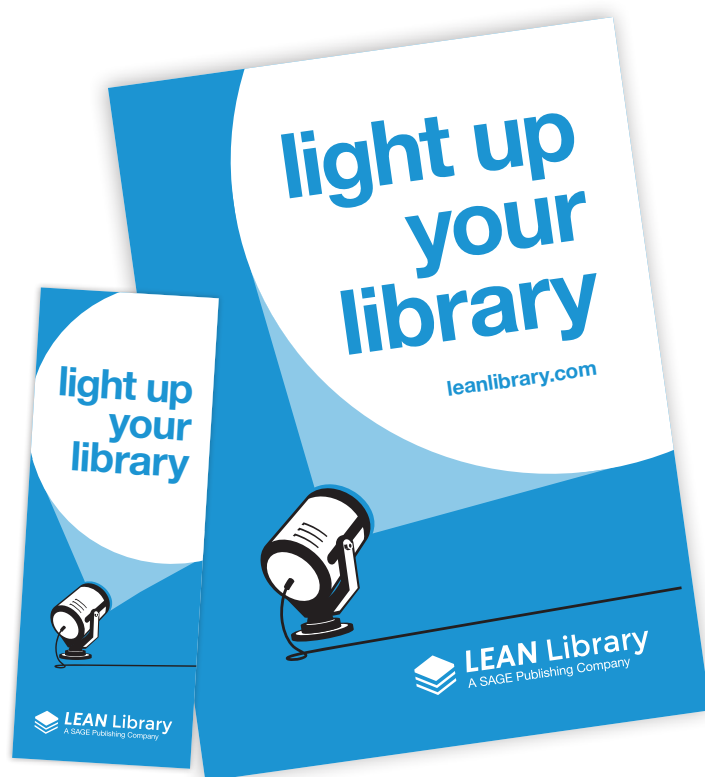

Let Lean Library work for you and your students

- Download the browser plug-in on your laptop or computer at leanlibrary.com/download >>
 - After downloading, select your institution and start researching.
- View use case videos to see how Lean Library works
 - Visit this resources page to see instances of **Library Access**, **Library Assist**, and **Library Alternatives** so you have a better understanding of how Lean Library benefits you [Also, see how Lean Library interacts with Google Scholar to enhance your results](#) >>
- Promote the extension to your students and researchers
 - [View and download support material](#) >>
 - Add Lean Library to your syllabus to recommend they download the plug-in. Doing so can help them utilize the library's resources whether they're on or off campus.

Recommended description:

Lean Library puts the library right into your research workflow. This browser plug-in allows for easy access to library e-resources anywhere, anytime. It also allows the library to share important messages with you and help you find alternative, legal access to journals and eBooks that hit a paywall Show students the use case videos.

- [Show students the use case videos](#) >>
