

Light up your library

Lean Library, now a SAGE company, delivers library services into your patrons' workflow, wherever they are.

Created by librarians for librarians, our powerful browser plug-in solves access issues and provides patrons with content as and when they need it, all while protecting their privacy and promoting your library's brand.

Lean Library offers three solutions for common challenges librarians and patrons face. Together, these solutions drive usage of library resources while helping you get in front of your patrons with the right message at the right time.

Access. Assist. Alternatives.

Find the right solutions to common challenges in the digital age:

- **Library Access** simplifies access to subscribed e-resources for researchers, whether they are working on campus or at home
- **Library Assist** promotes your library's value via a branded presence in your patrons' browser and enables delivery of targeted communications directly into their workflow
- **Library Alternatives** provides alternative legal routes to discover full-text articles and eBooks when patrons hit barriers

Award-winning

Winner of "Most Impact Product" at Charleston 2017, and the "2017 Disruptor Zone" at London Information Online.

Available in the most-used browsers

The **Lean Library** plug-in works in Google Chrome, Firefox, Edge, Internet Explorer*, Apple Safari, and Opera.

*For the best experience, we suggest using a different browser

Seamless access without sacrificing privacy

Lean Library is committed to privacy, holds no patron data and is fully GDPR compliant.

An easy transition

Lean Library's ready-to-go technology enables you and your patrons to transition into better communication and access with no downtime.

Once installed, patrons simply download the extension once to gain anytime access to library resources.

Lean Library has massively simplified the process of getting access to library licensed e-resources off-campus for users who bypass our discovery tool and go straight to vendor websites, or who find content in search engines.
